Lista dos 367 eventos do presente nos Boletim Sísmico publicados ao longo de 2021 pelo LabSis/UFRN, esse e o resultado da análises dos principais sismos registrados pela rede RSISNE operada pelo LabSis/UFRN no NE do Brasil. As incertezas epicentrais podem atingir 10 km.

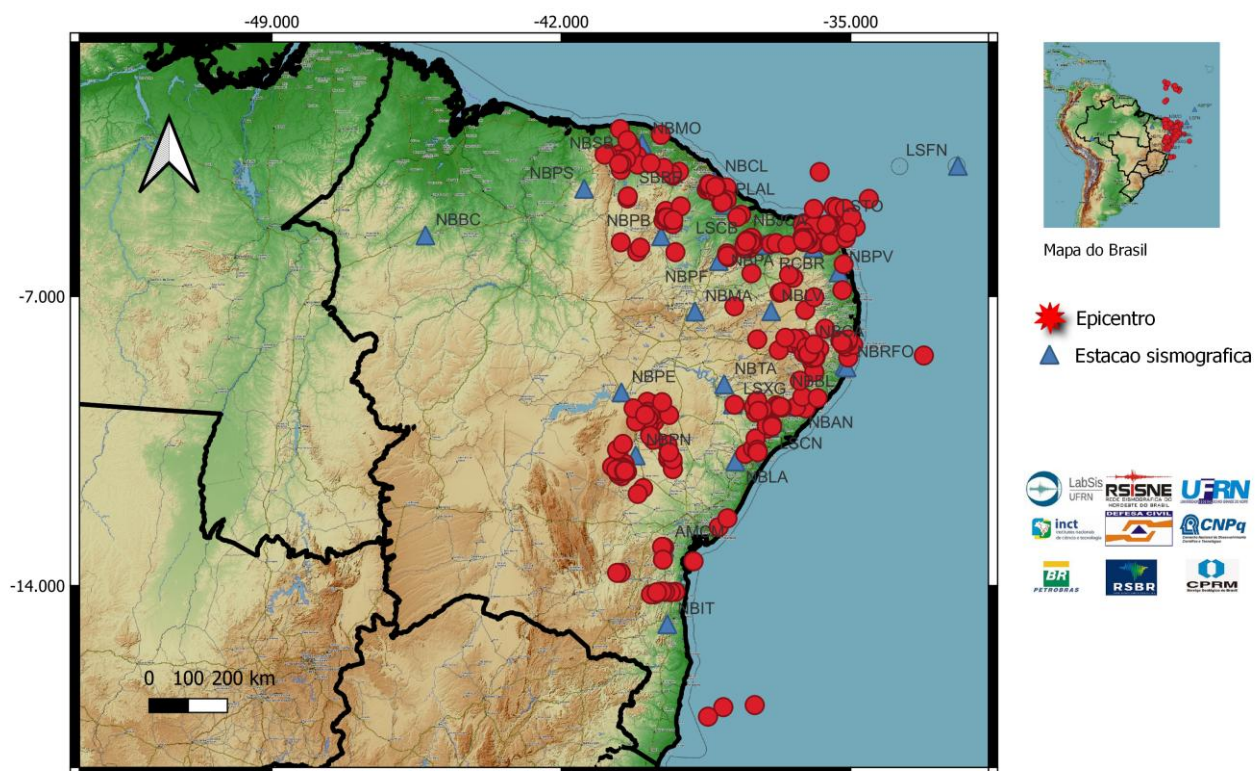

Figura 1 Mapa com a localização dos 367 eventos sísmicos mais relevantes presentes no Boletim Sísmico do LabSis/UFRN referentes ao ano de 2021. Os triângulos azuis representam a localização das estações sismográficas RSISNE operadas pelo Laboratório Sismológico da UFRN, as estrelas vermelhas representam a localização dos epicentros (eventos sísmicos).
